

Frederick Honors College (FHC) Research Fellowship Application Materials and Instructions

1. Frederick Honors College Research Fellowship Program Application Form (online)

2. Project Proposal: A 2-3 page description of the project you propose to do if awarded a FHC Research Fellowship. The proposal must be typed (double-spaced, in 12-point font, with 1-inch margins), have a title and numbered pages, and show your name at the top of every page. Applications should adhere to the 3-page. Reference lists do not count against the page limit. The project proposal is the key element of your application.

The interdisciplinary nature of the FHC Research Fellowship community requires every awardee to learn to discuss their research in a way that all members of this community can understand. This means that the use of discipline-specific jargon, and terms or acronyms common in your field, should be kept to a minimum. You should regard your project proposal as an opportunity to demonstrate your interest in becoming a member of an interdisciplinary community by proposing your project in terms that are accessible to a diverse audience. Students are encouraged to have peers in other disciplines read their proposals to ensure it is understandable.

In addition to meeting this overall criterion, a competitive proposal must include sections that address, at least briefly, the following topics:

- (1) A general introduction that provides a larger context for your project which your diverse audience could be expected to be familiar.
- (2) An explanation of where/how your project fits into that larger context and how the project contributes to an improved understanding of a larger question.
- (3) An answer to the “So What?” question. In other words, an explanation of why your project’s contribution is important in the context you described above (“important” does not have to mean “having a marketable outcome”).
- (4) The specific questions/goals/ objectives that your project aims to answer/achieve.
- (5) An outline of the method(s) you will use to carry out your project.
- (6) An assessment of the feasibility of completing your project within the time period of this fellowship.
- (7) If your project is part of a larger group effort, you should clearly identify the aspect(s) of the project for which you will be responsible.

3. Statement of Interest in the Community: A short, typed statement (no more than 1 page, double-spaced, 12- point font, with 1-inch margins) indicating why you are interested in participating in the interdisciplinary community of the FHC Fellowship. This statement should indicate what you hope to learn from other students as well as what unique perspectives you feel you could bring to the group. Please be specific.

4. Academic Transcript: This does not need to be an official transcript issued by the Registrar's Office, but please make sure it is up to date and shows your name, your declared major(s)/minor(s)/ certificate(s), and your current GPA.

5. Letter of Recommendation from Your Mentor: A signed 1-2 page confidential letter that addresses the following points:

- In what context and for how long have you known this student?
- Have you discussed the proposed project with the student?
- In your assessment, is the student prepared to carry out the proposed project?
- Can you provide the student with the support needed to carry out the project?
- Will you be able to find the time to mentor the student during the project?
- What degree of independence will the student have in carrying out the project? To what extent was the student involved in developing the idea for the project?

The mentor should be a Pitt faculty member or an experienced subject matter expert within the University of Pittsburgh system. The mentor should also have an academic background appropriate for the student's project. The mentor must submit the letter via the online application system. Mentors will receive an email requesting their letter only when the student's application has been submitted. If you are submitting your application at or near the deadline, your faculty mentor will have an additional three days to submit the letter. Students are encouraged to request this letter from their mentor well in advance of the application deadline so the faculty mentor can promptly submit their letter when the application is submitted. Students should also check with their mentor after submitting an application to ensure they received the letter request.

6. Submitting the Application: Submit your application online before the deadline stated on the website and application. Late applications will not be accepted and questions about the submittal process should be sent well before the deadline. Please do NOT email your application.
