

Water Scholars Community

Could you imagine a day without water? Water is an invaluable asset to our daily lives, ecosystems, and economy. The Pittsburgh Water Collaboratory (water.pitt.edu) unites staff, faculty, graduate students, and community partners to help you learn about Pittsburgh-region water assets and opportunities, explore the challenges we face, and connect with water leaders at Pitt and across our network. We'll introduce our participants to water specific environmental careers including water scientists, engineers, hydrologists, chemists, biologists, green building professionals, GIS analysts, science policy, and communication professionals. Join us for an exciting year of events and opportunities.

Associated Course: GEOL2961 Water in a Changing World
